Team Contract

[Team Availability](#)

[Tasks List](#)

Expectations from team members
- All members are expected to contribute an equal amount of effort throughout the design process and implementation.
- All members are expected to attend team meetings

Personal Goals
- Alexis: To become proficient in creating complex systems built and maintaining them in a small collaborative environment.
- Meryl: Generally, to get the full experience of designing & building a useful application. More specifically, to interview users about user needs & wants; to design a good UI/UX experience
- Daniel: To get the knowledge of how to work and collaborate with a small group to build a very useful web app from the ground up, and seeing how the frontend/backend and everything else interacts with one another.
- Veerapatr: To gain experience in the whole process of developing a webapp that has an impact on a small community.

Meetings
- Meet at Stud 5th, at least once a week
- Times: Wednesday 7-9, Sunday 5-8, Monday 6-9

Quality Control
- All code will be maintained in Github
- Code from individuals are subject to code review
- All specs will be written and discussed

Assignment of Tasks
- Section tasks into categories (Ie Interviews, Testing, design, implementation, documentation) as a todo list, and members roughly do the same amount of work in each section.

Decisions and Disagreements
- Majority vote when there's disagreement
- Decisions made through meetings
